[Posting- Registration is open for the Latin America/Caribbean Regional Symposium and Advanced Training on Ocean](#)

[GODAE OceanView](#) continues to provide coordination and leadership in consolidating and improving global and regional ocean analysis and forecasting systems. The Symposium objectives include:

- Getting a common picture of future development in all aspects of Operational Oceanography
- Motivating integrated international community projects to further advance science and benefits of Operational Oceanography
- Enhancing end-user awareness of present capacity and providing collaborative output of future in operational oceanography and end-user engagement

Webinar: New Study Highlights Need to Tackle Fisheries and Climate Together

The world's oceans have the potential to be significantly more plentiful than today even with climate change, provided good management practices are put in place and warming is held to no more than 2 degrees Celsius, according to the first-of-its kind study

NOAA, and other partners will hold a symposium on ocean acidification science and policy and an advanced training on ocean acidification in the Latin America/Caribbean region in January 2019 at INVEMAR in Santa Marta, Colombia. This symposium is open to all interested scientists, policymakers, and stakeholders; details about registration and applying for limited travel support can be found [here](#). Qualified scientists working in the region may apply separately to attend a second week of hands-on training to use the "GOA-ON in a Box" ocean acidification monitoring equipment.

Amigos de la comunidad costera Iberoamericana,

Nos complace informar que la VIGÉSIMO SEGUNDA VERSIÓN del Magazin Costero, especial CHILE, ya está disponible para su descarga libre en nuestro portal virtual. Pueden acceder directamente por el vinculo:
